

City of St. John Facade Renovations

Re: 8625, 8750 & 8938 St. Charles Rock Road
St. John, MO

JHOOKER Construction was awarded 3 facade renovation projects in 2012. All 3 projects were time-sensitive and required strict management as the TIF District was expiring at the end of 2012. JHOOKER was professional and thorough in their management of these projects. Tim Wurm, the on-site project manager, was particularly skilled at working with the City and the property owners in communicating schedule issues, problems with existing conditions and in suggesting creative solutions to problems encountered in the field. Even with unforeseen situations that arose, all 3 projects came in on time and within the expected budget parameters. The jobsites were always clean and safe and we did not have any issues with overflowing dumpsters, lack of regard for storm water runoff issues, and the other sorts of "incidental" issues we have often had with less professional companies.

I would heartily recommend JHOOKER Construction to anyone who is seeking an honest reliable, professional contractor. We will keep them on list of preferred contractors and will seek bids from them on future project.

James Phillips
Public Works Director
City of St. John
